Hydraulic comparison test pump
Model CPP1200-X

Applications

- Simple hydraulic test pressure generation on-site, in the laboratory or in the workshop
- For the testing, adjustment and calibration of all types of pressure measuring instruments
- Hydraulic pressure generation up to 1,200 bar

Special features

- Precisely adjustable dual-area spindle pump for filling, pressure generation and fine adjustment of pressure
- Freely rotating test connections (i.e. measuring instruments can be orientated)
- Proven technology of the model CPB3800 pressure balance
- Compact dimensions
- Low weight

Description

Application areas
Test pumps serve as pressure generators for the testing, adjustment and calibration of mechanical and electronic pressure measuring instruments through comparative measurements. These units can be used in the laboratory or workshop, or on site at the measuring point.

Easy operation
By connecting the test item and a sufficiently accurate reference pressure measuring instrument to the test pump, the same pressure will act on both measuring instruments. By comparison of the two measured values at any given pressure value, a check of the accuracy and/or adjustment of the pressure measuring instrument under test can be carried out.

Easy handling
The model CPP1200-X comparison test pump is a hydraulic comparison test pump for generating pressure up to 1,200 bar. It is technically identical to the instrument base of the model CPB3800 pressure balance. The integrated dual-area spindle pump with switching valves enables rapid filling of the test system and smooth pressure generation. At the same time, the precisely adjustable spindle pump also serves for pressure fine adjustment. A control schematic for pressure generation on the instrument base facilitates quick and easy operation.

The two test connections are equipped with G ½ female loose union connections. Corresponding thread adapters are available for the calibration of instruments with different connection threads.

Compact instrument design
The CPP1200-X is also particularly notable for its compact dimensions, which are not altered during operation, since the spindle runs within the pump body. With those dimensions, the exceptionally robust ABS plastic housing and the low weight associated with these, the CPP1200-X is also particularly suited for on-site applications.
### Specifications

Recommended reference pressure measuring instruments:

Precision digital pressure gauge model CPG1000

- Measuring ranges: up to 700 bar
- Accuracy: 0.05 % of span

For further specifications see data sheet CT 10.01

Hand-held pressure indicator model CPH6300

- Measuring ranges: up to 1,000 bar
- Accuracy: 0.2 % of span

For further specifications see data sheet CT 12.01

Precision hand-held pressure indicator model CPH6400

- Measuring ranges: up to 6,000 bar
- Accuracy: up to 0.025 % of span

For further specifications see data sheet CT 14.01

ProcessCalibrator model CPH6000

- Measuring ranges: up to 6,000 bar
- Accuracy: up to 0.025 % of span

For further specifications see data sheet CT 15.01
Scope of delivery
- Instrument base
- Dual-area spindle pump for filling, pressure generation and pressure fine adjustment
- 2 test item connections with G ½ female thread, loose union connection
- Adapter set for test item selectable from 3 different sets:
  - Set of adapters “BSP” G ½ male on G ⅛, G ¼, G ⅜ and G ½ female
  - Set of adapters “NPT” G ½ male on ⅛ NPT, ¼ NPT, ⅜ NPT and ½ NPT female
  - Set of adapters “metric” G ½ male on M12 x 1.5 and M20 x 1.5 female
- VG22 mineral oil (0.5 litre)
- Tool and maintenance set
- Operating instructions in German and English language

Options
- Versions for medium water or Skydrol
- Storage case for instrument base
